Peter,

There is only one crane in the state that is capable of lifting it from that height. I'll see what the schedule of the crane is. The other potential issue is what to do with the silo after it's been removed. It's winter time, and as such, companies aren't buying capital equipment until spring. I don't have the space at my home to store it, nor do I have the funds to rent a field to store it. It would present an adverse economic impact to me personally to move it in winter rather than spring (when mine operators are buying equipment). I have contacted former vendors and sent them pictures and descriptions of the equipment that's on site to see if there is a way for them to either buy it or take it on consignment.

That's the essence of what I was trying to convey last week. There is a much higher probability of successfully completing this project in the early spring than in the winter when snow, wind and inclement weather affect the efforts, along with the financial aspect of selling the equipment.

Best regards,

David Peterson

OK. Good to know.

You mentioned you know someone who could remove the silo, steel structures, and equipment sooner than later, as I remember. How soon could you have it removed?

Peter

Hello Mr. Brinton,

Thanks for the information. I'll begin acting on it immediately.

Best regards,

David Peterson

Hi David,

This isn't a complete list of individuals or company contacts who have (or have had) heavy equipment, most of whom either have mines or have had mines. We can't recommend any of them specifically, but they have experience with heavy equipment.

Russ Feller, 435-229-0999  
Gale George, 435-743-4545  
Jason Brunson, Red Dome LLC, 435-743-8111  
Steele Weston, Stone Cover LLC, 801-602-8466

Some of the trilobite quarry operators have earthmoving equipment that could be used.

Russ Henry or Shane Crapo (435-864-8402) If that doesn't work, I have other contact info.  
Clay Holman would probably be interested, but I don't have his phone right now.  
Bob Harris (435-864-2175)

We have had Rasmussen Excavation do some work for the Division in the past. They are from Salina. 435-201-1699

I saw that there's a Rancho Equipment Services and also a Westside Grading Company in Delta. Not sure exactly what they do.

There are probably some mine operators in Juab County that I am unfamiliar with that may be interested as well. You could check our interactive map to look into them: <http://www.arcgis.com/home/webmap/viewer.html?webmap=6b3e262bbe4c43d1a71288b5e297353c&extent=-119.2757,35.7523,-104.9715,43.9742>

I am sure there are others that I am unaware of that could do the work and would be interested from Delta, Fillmore, Nephi, etc. I would also do a web search to see who else in the general Millard/Juab county areas that we are missing with this list
